

Symposium on Ocean-Margin Systems

Bremen, October 19, 2005

<i>Time</i>	<i>Presentation</i>
09:00 – 09:45	Aneta Nikolovska (Melbourne): Bubble streams as underwater wires for measurement of the seep fluxes – theory and experiments
09:45 – 10:30	Thomas Pape (Hamburg): Biogeochemistry of seep environments - a lipid biomarker approach
10:30 – 11:15	Jeroen Groeneveld (Kiel): How did the Miocene/Pliocene closure of the Panamanian Gateway affect Atlantic/Pacific upwelling system? – A reconstruction based on combined Mg/Ca and $\delta^{18}\text{O}$ measurements
11:15 – 12:00	Aggeliki Georgiopoulou (Southampton): Turbidite deposits and submarine landslides on the NW African margin

Venue: MARUM Building, Leobener Str., Seminar Room 2070
